

Graham Manufacturing Grows With GCEDC Partnership

Project Overview: Graham Manufacturing, a global leader in the design and manufacture of mission critical fluid, power, heat transfer, and vacuum technologies, desired to expand in the City of Batavia. Having a strong workforce pipeline and financial certainty were necessary for the project.

Project Solution: The GCEDC's financial incentives supported the construction of a 28,867 square-foot expansion at Graham Manufacturing's campus. The GCEDC also champions the growth of welding training programs at SUNY Genesee Community College and Genesee Valley BOCES, including a youth apprenticeship program.

Company Perspective: "We've got a really good partnership with the GCEDC, we rely them to help us navigate the waters within Genesee County and also to help us with incentives and different things that we can do to help the community and have them help us."
